**Subject:** PRG meeting with request to discuss P.O. Bar ...

Marci, I think it is a good to sit down and have Tim go through his calculations. This should shed light on the larger policy issues in the SEF implementation and provide clarity on the PRG's level of decision making in these types of projects. Pete and I will try to participate in the meeting (and possibly Alex and Keith as well). However, we strongly recommend that Jonathan Freedman and Chip Humphrey of EPA be present in the meeting as well, to understand the complexity of the different scenarios that are being addressed. It is important for EPA and the Corps to have an understanding of the implications of dredging within the Superfund site, esp. with regard to future impacts and requirements; and it is important for DEQ to find a pathway within EPA's authority over the water within the CERCLA site. Additionally, DEQ would like to have EPA's guidance on controlling impacts from the dredge work and potential well beyond the immediate dredge area. I have my schedule open on June 10<sup>th</sup> or the 11<sup>th</sup>.

Thanks,

Genet
